

Become a Sponsor of ICNC!

The ICNC is a premier event hosted by the EANM and ASNC dedicated to delving deep into a specific topic within the realm of nuclear medicine.

The upcoming ICNC'26 Congress offers a unique opportunity to engage with a global network of experts dedicated to advancing cardiovascular care through nuclear medicine and cardiac imaging.

This high-level session will critically examine the role of nuclear cardiology in the modern management of heart disease, highlighting innovations in SPECT and PET imaging, hybrid modalities, and the integration of cardiac CT. Special emphasis will be placed on the use of imaging in diagnosis, risk stratification, treatment selection, and long-term monitoring.

With the emergence of targeted therapies—particularly in conditions such as cardiac amyloidosis and inflammatory cardiomyopathies—precision imaging has become more vital than ever for guiding clinical decisions. The session will also explore novel radiotracers, AI-driven quantification tools, and key areas of clinical controversy through collaborative expert discussion.

Our panel features internationally recognized opinion leaders in nuclear cardiology. An estimated 400 experienced professionals from Europe and beyond will ensure a rich and impactful exchange of expertise.
